

THE D. E. STEARNS COMPANY

D.E. STEARNS RENTAL PROGRAM

Model 14/20

The D. E. Stearns Company offers all of its instruments on rental terms. The instruments are rented in the same configurations as they are sold, and rentals are offered from stock. The holiday detectors include the spring electrodes of choice with the rental, at no additional charge.

Rental periods are billed per day, with a five (5) day minimum rental period. A deposit may be required.

Rentals are available in the US and Canada only.

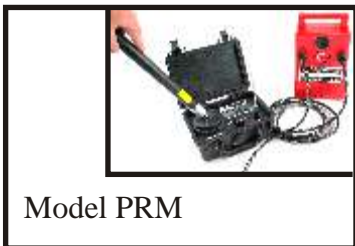

Rental rates vary by instrument, but all are very competitive with offerings from other companies.

Model 20

D. E. Stearns instruments available for rental in the US and Canada:

Model 10/20: High Voltage Pulse DC Holiday Detector, .81kV - 35kV (800v - 35,000v)

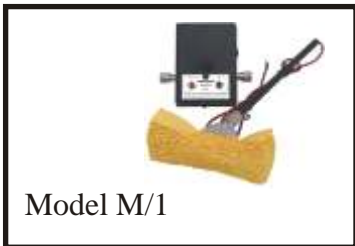

Model PRM

Model 14/20: High Voltage Pulse DC Holiday Detector, 1kV - 14kV (1,000v - 14,000v)

Model 10: High Voltage DC Holiday Detector, 1kV - 3kV (1,000v - 3,000v)

Model 20: High Voltage Pulse DC Holiday Detector, 6kV - 15kV (6,000v - 15,000v)

Model M/1

Model 20-S: High Voltage Pulse DC Holiday Detector, 22kV - 40kV (22,000v - 40,000v)
